CARING FOR YOUR TATTOO

We declare that we have practised our art in compliance with current regulations, particularly regarding health and safety, and that we have used single-use, sterile equipment.

OUR WORK IS DONE, YOURS BEGINS

PROPER TATTOO CARE IS CRUCIAL

Follow these instructions carefully for good healing and to prevent infection.

Always wash your hands thoroughly before touching your tattoo.

Gently remove your dressing 2 to 48 hours after your tattoo is finished.
(12 hours maximum for “basic” or “cling film” dressings).
If it sticks, do not force it: soak the dressing with lukewarm water.

Gently clean the area with lukewarm water, without soap or with a pH-neutral soap.
Pat dry carefully with a clean towel or kitchen paper.
DO NOT RUB.

Apply a thin layer of the cream or oil you were given 2 to 3 times a day.
(a healing or repair cream can also be used).

During the first nights, be careful with your clothes and bed sheets.
Your tattoo will probably release some ink: this is completely normal.

Protect your tattoo from soap and shampoo in the shower.
Throughout the healing period, baths, the sea and swimming pools are forbidden.
Saunas, hammams and jacuzzis are also off-limits.
You can still take a shower to wash.

Small flakes of dead skin or “scabs” will form during healing.
Do not touch or pick them: they will fall off on their own.

If it itches
DO NOT SCRATCH
(itching means it is healing).

Avoid touching the area with dirty hands during the day.
Protect it from dust and dirt (pet hair, cement...).
Wear loose cotton clothing to let your tattoo breathe.
Watch out for belts, bra straps and any clothing that may rub.

Keep your tattoo out of the sun and UV light throughout the healing period.
(1 month minimum).

1 month later, we offer a check-up visit to make sure it has healed well.
If your tattoo artist asks you to come back for touch-ups, do come back!
They are included in the price and give you the best result over time.

Applying moisturiser and protecting your tattoo with SPF 50 sunscreen
after healing can improve the final look and help your tattoo age well.

Respecting our work by caring for your tattoo is the best proof of your satisfaction.
Following these instructions = the best chance of a beautiful, healthy tattoo.
